

# MINES AND MINING STOCKS FINANCIAL AND COMMERCIAL

# GOLD ORE FROM THE YANKEE CON.

First Car Ever Produced From Godiva Hill on the Market.

### MORE OF IT IS YET TO COME

CENTURY MINE BEING SYSTE-MATICALLY DEVELOPED.

The first carload of what may be termed straight gold ore ever shipped from Godiva hill, Tintic, will be marketed by the Yankee Consolidated Mining company today. It comes from the 100-foot level below the tunnel and the second carload of it is now about ready to send out, while the report of Superintendent J. P. Turner to Secretary L. A. Amsden is that he cannot yet tell where the limits of the shoot will be found. The Yankee, like all of the other mines on Godiva mountain, is pre-eminently a silver-lead proposition, though some gold is associated with the other metals, with occasional little streaks and pockets that run up well. The Yankee, however, is the first mine The Yankee, however, is the first mine to be able to boast of having sent out carload of it.

It was not expected that the ore in carload lots would show sensational value, though some mine assays taken during the past week ran up quite high. When returns were had last evening it was found that the rock carried \$30.21 was sufficient to knock a fair-sized hole in the silica penalization.
"We had a notion," said Secretary

Amsden, when asked for the returns from the assayer last evening, "that the ore would average about two ounces gold, so you see we were fooled a little. The drift from which this ore came was one on the 100-foot level, where, for more than 100 feet the driving through and mining of first-class lead-silver ore had been progressing for some time. The lead ore was taken out hack to the quartz which was left standing. Several days ago, when more of the quartz than usual appeared in the fact of the drift Superintendent Turner decided to sample it. His first besays carried such high values that he felt a mistake had been made and he tried it again. He then began to samples. He found that he had considerable rock that contained little eise than gold, so he has since been breaking it down and putting it by itself for shipment. We are not yet prepared to say that the Yankee is going to develop into a gold mine, but it makes a fellow feel good to realize that mate-rial which was formerly not paid much attention to is of such character that it can be marketed at a handsome

Raising in the main fissure from a point on the 500-foot level below the tunnel is progressing, Mr. Amsden reports, but as yet there is no strike to record.

# CENTURY'S DEVELOPMENT.

### Management Is Opening up the Mine Systematically.

The blocking out of new ore bodles in the Century goes steadily on and Manager P. W. Madsen, who returned from the mine Wednesday night, stated yesterday that, while the mine was in to justify the starting of the continue the development campaign for

get the mine well opened up and in the future keep the development a long way ahead of the requirements of the miling plant. What we term the No. 4 vein, which was cut about the time we closed the mill down, has since been opened up for a distance of 150 feet on the lower tunnel level. This vein has been varying in thickness from eighteen inches to two feet thick, only, but different ore bearing channels in the Century as separate veins, the various cross cuts made on different levels has perfectly demonstrated that they are all simply constituent parts of one great

ledge, running from thirty-six to over forty feet wide and traceable all the way through the property in a northerly and southerly course. All the material between the pay stratas is ledge unineral, mineralized, but not carrying values sufficient to handle.

"We are opening up new ground on the two or three levels and every 100 feet we are connecting up from one level to the other. In this manner we are getting lots of ore blocked out and the process is to be continued indefi-nitely. Even after it is decided to be gin milling again it will be the policy to add to rather than cut down the re-serves in the mine, for I don't intend shall be charged against again that the mill is ahead of the

Former Superintendent James Rosethe mine and he was pleased with the splendid manner in which the ground is responding to the plan of development that was last fall inaugurated.

## LA SAL'S AWAKENING.

## Strong Combinations Have Underta-

ken to Bring Country Out. The outlook for the LaSal mining dis trict is much brighter than at any time during its history. This is not because a large number of prospectors are at work in the district, but because the pioneer surface scraping, staking period, through which all successful mining sections must pass, is evidently over, says the Grand Valley Times. Interests have now been acquired by nen who realize that it takes a small ortune to make a good prospect a tine. That it takes deep mining on the veins to open up the ore shoots. Men who have had experience in min-ing and will see that experienced miners superintend the work. Men who create confidence in the possibilities of a district by their open, clean cut work, and who are not afraid that their work will be seen by men who know what

mining work is.

A season of activity with such men working on such lines will create a stimulance that must ultimately bring taxched the long looked for results. Mines as famous as the richest in the world are Andes

laying in the LaSal mountains, and are laying in the LaSal mountains, and are yet to be developed.

The Derigo-International consolidation of the fine prospects in Beaver Basin has been accomplished and Bos-

ton capital, sufficient for all purposes of development, has been guaranteed for Sinbad valley properties, which have lately been acquired by an east-

re strong, it was not possible to shake in loose in any quantity. During the regular and open board calls only a start of the shares, with a selling value of 91.38, changed hands.

The property of the strong at 16% cents, dropped to 16% cents and then moved up and sed strong at 17% cents. Uncle San nearly as well, starting at 38½ cents I closing at 40 cents.

The property of the strong at 1 closing at 40 cents, as was also New York at 49% of cents.

## Utah Stocks in Boston.

James A. Pollock & Co., bankers and brokers, yesterday received over their private wire from Paine, Webber & Co., one of their Boston correspondents, the following copper market comment and record of sales of Ctah stocks on the Boston, Market, with range and closing quotiffans:

Boston, March 23.—The market today,

although somewhat weaker, did not show any gemine liquidation except in Mass and Franklin, which were sold on strike news. There were few market orders to sell osceola this morning. The demand was good and the stock closed strong at mow out of those troubles, and the men now in control are working a good force of men opening up new ground. A property like this, which has produced over a haif million dollars' worth of silver and copper, and hardly yet been prospected, is not likely to be forever abandoned.

### BINGHAM CON. MATTERS.

Heap Roasting of Sulphide Ore-Manager MacVichie May Quit.

It was reported here yesterday that the Bingham Consolidated company was making preparations at its Bing-ham mines to try the experiment of heap-roasting its sulphide ores. As Manager Duncan MacVichie had gone to Denyer there was no way of getting to Denver there was no way of getting a verification of the report, though a man in close touch with the management declared his belief that the proposition was not contemplated, if at all, as a means of overcoming the fume

"Of course," said be, "I don't presume "Of course," said be, "I don't presume to know what the management is going to do, but the fact that the Ringham company's smelter employs the pyretic process—a process which is based on making the sulphur in the ore do the smelting—makes it certain to my mind that so long as the company remains in the field for custom ores it will not bother to give the product of its own mines a preliminary roasting before forwarding them to the valley plant. A test may be made simply to determine what hight be done in case the worst came to the worst and the company decided to close its valley works, but such a state of affairs seems altogether impossible to me. The Bingham company is not a serious offender, anyhow. The very fact that the sulphur in its ores is practically all consumed in the roasting process is proof against much of it finding its way into the atmosphericans. f it finding its way into the atmo ompany seriously contemplates heap-pasting at Bingham, it must be beroom for custom ores at its valley

It was also learned during the day hat there is a strong probability that General MacVichie will sever his con-General MacVichie will sever his connection with the Bingham company in June. The statement was made that the captain has been anxious to free himself from the great strain that the position entails upon him for a good while back. He is under contract, however, to remain with the company until June, and it is said that the company would not listen to his quitting before that time, while every effort will be made to get him to continue. The annual meeting of the company will be held in Boston next month and at that time the finest report ever listened to by ime the finest report ever listened to by the stockholders will be submitted by Manager MacVichie. At the same time he will, it is expected, formally notify

W. K. Mordoch, superintendent of the Honerine company's milling plant, was in from camp yesterday for the first time in several weeks. Eight cars of ore from Tonopah, four from Tintic and one from Bingham were reported at the Taylor & Brunton sampler yesterday morning.

A. 'B. Lewis left for New York yester-day on business connected with the Ne-vada-Utah company, which is gradually rounding into shape for the vigorous campaign ahead.

campaign ahead.

T. J. Osborne, the well known mining and business man of Pioche, is up from camp on a short business trip. He states that the camp is fast coming out of the kinks, and that the future looks brighter than it has in twenty years.

Manager M. J. McGill of the New York Bonanza was down from the Park yesterday attending the funeral of the late John G. Rhodin. He says the mine is looking well and that during the next day or two there will be another lot of ore on the market. He returns to camp this morning.

morning.

Ira B. Jones, the official caller of the local mining stock exchange, left for Los Angeles yesterday to join his wife and family. Mr. Jones has been on the sick list for the past two weeks or more and will spend a month or more on the coast in hope that it will benefit his health. Stomach troubles have knocked nearly fifty pounds off his weight during the last fifteen days.

GRAIN AND PROVISIONS.

Chicago, March 23.—Weakness prevailed in the wheat market here today as a result of continued excellent weather for crops. At the close wheat for May delivery was off 1%. July wheat is down with the common of the wheat market was weak from the start. Opening trades were marked by a decline of over 2 cents in the price of the May delivery and 1 cent in July. Initial quotations on May were off % to 2% at 1.124@1.11%. July was down % 60% to 5% 60% at 91 to 91%. Heavy receipts in the northwest had much to do with the opentrade declines. Lower cables were also a factor. Weather extremely favorable for the rapid growth of the new crop attracted, however, most attention. After May had touched 1.12 and July 90%, the market rallied somewhat on covering by shorts. May advancing to 1.13. The market, though, lacked any definite support news from the winter wheat belt being of such bearish character as to discourage demand.

The July option was under considerable

with always the best paint and painters. Our wall papers the most artistic and the prices right. W. A. Duvall, 110 West Second South.

# BY BEAR PARTY

demand.

The July option was under considerable selling pressure during the last part of the session, declining to 904. Cash news from all markets was bearish late in the day. The market closed weak with May 1.12%. Final quotations on July were 90%. Clearances of wheat and flour were equal to 134.700 bushels. Primary receipts, 513,100 bushels, compared with 416,400 bushels a year ago. Minneapolis, Duluth and Chicago reported receipts of 361 car, against 218 last week and 311 cars a year ago.

Notwithstanding the sharp break in wheat prices the corn market was compared to the corn market was compared against 218 last week and 311 cars a year ago.

Notwithstanding the sharp break in wheat prices the corn market was comparatively firm. May opened unchanged to ½ lower at 48 to 48½, sold between 48% and 47% (487%, and closed at the top. Local receipts, 425 cars, eleven of contract.

Weakness of wheat had a depressing effect on the oats market. May opened unchanged to ½ lower at 30% (30%), sold between 30½ and 30% and closed at 30%. Local receipts were 152 cars.

A large increase in stocks and liberal receipts of live hogs caused weakness in provisions. At the close May pork was off 2½ to 5 cents at 12.77½. Lard and ribs were each a shade lower at 7.67½(67.10 and 6.87½(36.30).

Estimated receipts for tomorrow:

Estimated receipts of a for tomorrow:

Notwithstanding the sharp break in the story was heard of a comping er of southern iron companies, although new auspices for the project were presented. The professional element amongst the operators seemed convinced by the events of the last few days that a considerable decline in prices was before the market still. This served to encourage the organization of operations on which they proceeded. It was believed from various indications that intimations that very extensive liquidation had been accomplished already on the part of those who had already on the part of those who had accumulated stocks on the largest scale on the score of merger rumors, pro-fessed expectations of dividend in-creases and other influences which had carried prices to the excessive level before the reaction. With this liquidation effected it was assumed that the market would no longer have the benefit of the power of the organization support which had guarded it until this speculative liquidation was con-cluded. The bears were therefore hope-ful of inducing selling by driving down prices. The events of the morning proved the justice of their expectation. The extent to which the reaction had run at the low level of the morning in-duced caution on the part of the hears. duced caution on the part of the bears and prompted large covering of short lines. The manner in which the rally was extended also suggested that a considerable element amongst the pro-fessionals had turned to the long side of the market again on the assumption that the market was ripe for a further rally. The day's fluctuations were al-most wholly due to such considerations as these and news of actual conditions

bearing on values played little part in the market.

The assembling of the British cab-

inet was made the occasion for the re-vival of peace rumors in the far east. An increase in the dividend rate by one of the great foreign copper companies was a sustaining influence for Amal-gamated Copper. The close was firm at about the top level. Bonds were irregular. Total sales, ar value, \$3,735,000.
United States bonds were all un-

### hanged on call. Bond Quotations.
